

Fresh and Saltwater Systems Topic 3-4 Vocab

Across

- 1 Continuous movements of ocean water
- 4 The system of water flowing through porous rock
- 7 The steep slope starting at the edge of the continental shelf
- 9 The measure of the amount of salts dissolved in a liquid
- 11 The difference in level between a high tide and a low tide
- 13 The area of land that drains into a body of water
- 14 The area between the coast and the edge of the basin
- 16 The process in which eroded material is dropped or left
- 18 The highest part of a wave
- 19 The tumble of water when a wave collapses on shore
- 21 Areas of water occurring in low areas. They are important habitats for many species
- 22 Smooth waves near the shore
- 23 Water that doesn't soak into the ground or evaporate, but flows across Earth's surface

Down

- 1 The long range of mountains dividing North America
- 2 Wide, open features of the deep sea
- 3 The distance from crest to the next crest
- 5 Generally a flat area of land that is prone to flooding
- 6 Pollutant is from a small, defined area
- 8 The amount of water discharged by a watershed
- 10 Narrow, steep-sided canyons formed along some ocean ridges
- 12 In the ground, the level beneath which porous rocks are full of water
- 15 The winds that push ocean currents toward the west
- 17 Allowing material (such as water) to pass through
- 18 Determined by the amount of matter suspended in the water
- 20 The movement of sediments from one place to another
